Villa ADA

 Portisco, Sardegna

Beautifully situated between Porto Cervo and Porto Rotondo and designed by the famous architect Ferdinando Fagnola, the villa seems to blend into the green hills above the Costa Smeralda so seamlessly that it is scarcely noticeable from sea. Protected and yet flooded with light, constructed of concrete and yet colorful, the design skillfully combines what seem to be opposites.

This magnificent PROPERTY is located between Sardinia's most famous Resorts, Porto Cervo and Porto Rotondo, both of which are only fifteen minutes away. The villa has a fantastic 270 degree view of the Mediterranean. Use of the PRIVAT DOCK directly in front of the villa is incredibly practical for daily use, great hotels shops and restaurants
